19. QUALITY OF SERVICE & COMPENSATION

19.1. The minimum annual Service availability on Vodafone's Network, excluding Force Majeure cases and/or faults attributable to the Customer and/or other third parties, is 99%. In case of lack of full service performance of a Customer's Fixed Services, a maximum repair time of two (2) Working Days shall apply from the date that the fault was reported and subject to the Customer accepting the first available appointment. This excludes any cases of force majeure, damage or disruptions caused by third parties or the Customer himself/herself. The Customer agrees to adhere to any reasonable instructions issued by Vodafone in order to facilitate Service restoration. Where such instructions are not adhered to, the Customer acknowledges that Vodafone may not be able to adhere to this timeline. Fault rectification is free of charge unless it is attributable to the Customer and shall be charged as per the fees mentioned in the Specific terms and conditions.

19.2. Vodafone Malta's Fixed Services are offered on a contention ratio basis and all facilities for traffic management, routing as well as the bandwidth itself are shared amongst a number of users. The quality of service may vary according to the number of users online at any one time and cannot be guaranteed.

19.3. Vodafone Malta shall endeavour to provide the customer with a connection speed that reflects the Fixed Services which is being subscribed to. The connection speed is the speed at which data is transferred between the customer's computer and Vodafone Malta's core network. The connection speed will always be greater than the download speed, which is the speed at which data is transferred from the internet to the user's computer, since download speed is dependent on internet or network congestion, and the speed of websites that the user connects to on the internet,

among others. The maximum connection speed that can be achieved on the connection will vary based on a variety of factors, including, but not limited to:

- a) distance from the base station;
- b) load on the base station providing the Fixed Services;
- c) radio coverage at the customer's premises;
- d) number and type of appliances utilising the customer's connection

19.4. Quality of service is also dependent on the users' traffic patterns and Vodafone Malta performs bandwidth management at an application level to ensure that bandwidth is being shared fairly amongst users. This management also ensures fair weighting between various applications to ensure that heavy usage applications such as peer-to-peer downloads do not congest the system in a way that the system becomes unusable for other users. Broadband services continue to be offered as they have always been, on a best effort basis.

19.5. Network management procedures and tools that are consistent with industry practice are utilized to ensure that the integrity of the Vodafone network is maintained. In cases when the Vodafone Malta's network is at risk of being congested, Vodafone Malta reserves the right to take whatever action it sees fit in order to ensure that the quality of service is not impacted. These actions may result in customers experiencing varied service and performance levels.

19.6. Vodafone Malta reviews individual subscriber upload and download usage and behaviour relative to average customer use of the network for each product. In the case of congestion caused by abusive use of the service or activities which impair other customers from accessing the network, Vodafone Malta may intervene by notifying the customer of the abusive behaviour. Where traffic is repeatedly abusive Vodafone Malta reserves the right to stop provision of the Fixed Services.

19.7. The technology used to provide the Fixed Services is in Vodafone Malta's sole discretion.

20. SERVICE PROMISE

20.1. Vodafone shall do its utmost to provide continuous and good Fixed Services, however it acknowledges that problems may arise. In these cases, the Customer may report the matter to Vodafone for further investigation and may escalate the matter if not satisfied with the outcome. Should the Customer remain without the Fixed Services in the event of the Vodafone's Network fault, a pro-rata credit compensation shall apply to Customer's Account. This excludes lack of service attributable to (a) Force Majeure, (b) any circumstance which is attributable to the Customer and/or (d) when the Customer refuses access to his premises from the dates proposed by Vodafone. The pro-rata compensation will be calculated on the monthly fee payable to Vodafone in line with the applicable Specific terms and conditions from the day the fault was reported until it was resolved.

20.2. If the Customer believes that the Fixed Services provided deviates from the contracted typical speed range (TSR), the Customer may contact Vodafone as per Condition 19.1. If after due investigation it results that Vodafone cannot provide the Fixed Services, the Customer shall have the right to rescind the contract without incurring any penalty charges.

20.3 Although Vodafone supplies the Customer with the Equipment of the highest standard and quality, it is not excluded that the Equipment or any component might get faulty. In such case, the Customer should visit Vodafone Service Centre in Birkirkara, so the Equipment can be inspected and diagnosed. Vodafone will fix or replace the Equipment free of charge immediately there and then. Provided that the Customer is not entitled to a free repair and/or replacement, if the

diagnosis proves that the fault of the Equipment is attributable to misuse, mishandling, wilful damage by liquids, connection to unsuitable supply, power surges, lightning, tampering, service by unauthorized persons or any other use of the Equipment that is not in line with term 4.2. In such cases the Customer will be liable to pay to Vodafone a repair and/or replacement charge depending on severity of the diagnosed fault.

21. CHARGES
