

Speed Guide for our RED Unlimited Plans.

This speed guide is for RED Unlimited Super and RED Unlimited Giga Pay monthly plans launched on the 10th January 2019, for the avoidance of any doubt this speed guide does not apply for any other Pay Monthly plan tariff. The Speed Guide for informational purposes only and its aim is to give you a clearer explanation on the speed experience of RED Unlimited Plans. Remember that the actual speeds you reach will continually vary depending on many factors such as device capabilities, location, network congestion, network coverage and if you are roaming.

For the details about the RED Unlimited products kindly visit page: [Here](#)

We've put together a table showing you the experience you may have during different types of activities you might have whilst using mobile data:

1. With the **RED Unlimited Super** at up to 10Mbps speeds you can stream music, make a video call, browse the internet excellently, catch up on social media, browse through your emails, stream your favourite sports game, download movies & upload documents.
2. The **RED Unlimited Giga** gives you the full experience on the Vodafone Network at 4.5G speeds ([4G here](#)). Apart from the above experience you can stream videos at Ultra High Definition, engage in virtual reality, enjoy gaming on your device and download or upload large files or documents.

	Data at Streaming Speed at up to 10Mbps with the RED Unlimited Super (Our Recommended)	Data at Streaming Speed at 4.5G on RED Unlimited Giga
Web browsing	Excellent browsing experience with quick loading time	Super excellent browsing experience with quick loading time
Music streaming (eg Spotify)	Streaming music is unaffected, and similarly loading of images/artwork should be unaffected	Streaming music is unaffected, and similarly loading of images/artwork should be unaffected
Social media (eg Facebook)	Loading of content should be unaffected. Content fast to load	Loading of content should be unaffected. Content super-fast to load
Streaming Standard Definition (SD) video (eg youtube)	Video is fast to start playing and images/artwork are immediately loaded Loading and playing of Video unaffected and similarly loading of images/artwork should be unaffected	Video is super-fast to start playing and images/artwork are immediately loaded Loading and playing of Video unaffected and similarly loading of images/artwork should be unaffected
Streaming High Definition (HD) video (eg Netflix)	Compatible with HD Video and most video services will automatically default to HD quality.	Compatible with HD Video and most video services will automatically default to HD quality.
Streaming video at Ultra High Definition (UHD 4K & 8K)	Incompatible and most video services will automatically default to HD quality.	Compatible with UHD Video and videos can be streamed unaffected
Gaming on your mobile	Not recommended as downloads of big games may be slow and experience may be effected.	Ideal as this would have low latency and also you can enjoy full download speeds.

Virtual Reality & Authentic Reality on your mobile	Not recommended as downloads may be slow and experience may be effected.	Ideal as this would have low latency and also you can enjoy full download speeds.
Downloading apps and files	Downloading of Apps & Files should be unaffected. Big files may take longer to download.	Recommended for downloading and uploading large files and documents
Tethering	Tethering is suitable for single use only. If multiple devices are running together, videos will most likely be restricted to SD, may be slower to load and/or buffer and web pages and content may be slower to load. This is applicable for all RED Unlimited plans	

Your experience may degrade on larger-screen tablets, when compared to a smaller-sized mobile phone or tablet.
